Bibliography of Included and Excluded Papers

The following pages present the list of papers from which data were extracted and used in this paper. Some papers are listed in multiple sections, such as a paper that tested both a conditional cash transfer treatment arm and an unconditional cash transfer treatment arm, but in the data it is clear which results come from which paper, and no results are included twice. Many did not overlap in outcomes with other papers on the same intervention, and thus were unable to be used for the analyses in this paper. Those that were used for the main results of the paper are denoted with an asterisk.
