

Bibliography of Included Papers

The following pages present the full list of papers from which data were extracted and used in this paper. Some papers are listed in multiple sections, such as a paper that tested both a conditional cash transfer treatment arm and an unconditional cash transfer treatment arm, but in the data it is clear which results come from which paper, and no results are included twice. This list excludes those papers that did not contain information about significance to a high enough degree of precision for use in caliper tests (for this paper, defined as allowing the creation of a p-value to a minimum of three decimal points).

CONDITIONAL CASH TRANSFERS

- Akresh, R., de Walque, D. and Kazianga, H. (2013). ‘Cash transfers and child schooling evidence from a randomized evaluation of the role of conditionality’, World Bank Policy Research Working Paper No. 6340.
